DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to a method or electronic circuit system for analyzing a chemical reaction pathway, classified in class 702, subclass 19.
- II. Claims 22-25, drawn to a circuit group representing the interaction pattern, classified in class 702, subclass 19.
- III. Claim 26, drawn to a method of manufacture of an electronic circuit, classified in class 29, subclass 592.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions III and [I, II] are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are in different classes and serve different functions. While Invention III is a method of manufacture of a circuit, Inventions I and II are a method and a system for electrical analysis of a chemical reaction. The two inventions are distinct and provide undue burden if searched together.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

Art Unit: 1631

the instant case the different inventions serve different functions. While Invention I is a method of biological and/or chemical reaction pathways, Inventions II and III are systems of circuits; the method group and the systems groups serve different functions and are therefore unrelated.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
